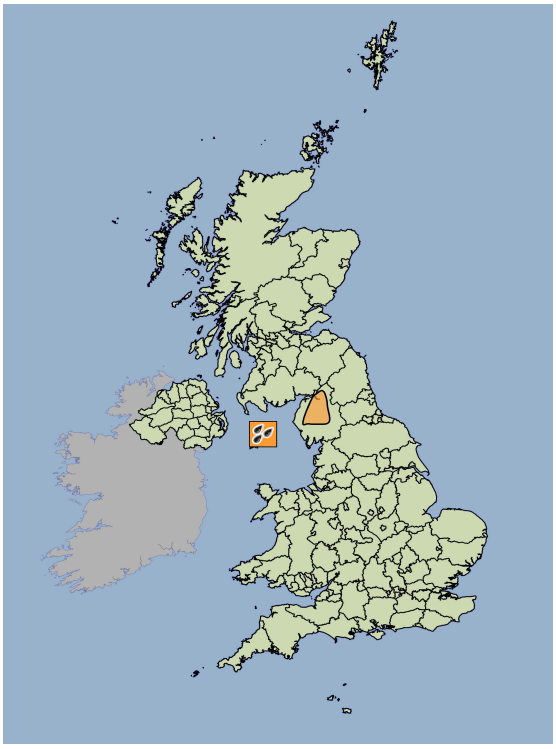
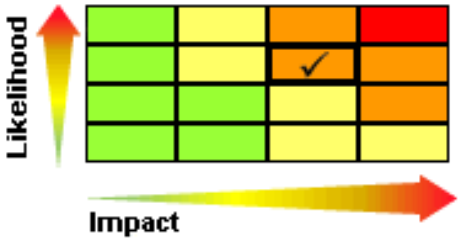
National Severe Weather Warning Service





Chief Forecasters Assessment
A cold front will become slow-moving across the area on Tuesday night and early Wednesday before clearing during Wednesday afternoon. Rainfall accumulations of 60-70 mm are possible quite widely, with perhaps in excess of 120 mm or more in the most exposed spots on high ground. Some medium level disruption due to flooding from either rivers or surface water is thought likely.

The Met Office have issued an **Amber Warning** of **Rain**

Valid from **00:15 on Wed, 30th Dec 2015** until **15:00 on Wed, 30th Dec 2015**

Rain, heavy at times and often prolonged, will affect many parts of western and northern Britain on Wednesday. Some large rainfall accumulations are likely across parts of Cumbria.

Rainfall amounts and impacts will not be as great as across Cumbria in early December, but some impacts are likely due to flooding. Please be prepared for possible disruption.
